

# PLUSH

◆ TALL FESCUE BLEND ◆

**A** economical, low-maintenance turf for home lawns, athletic fields, parks, commercial turf areas, highway shoulders and golf courses. The improved turf-type varieties contained in PLUSH Blend are chosen to retain the major low-maintenance benefits associated with Tall Fescue.

PLUSH is a dark green, fine textured blend. It's compatible with the darker green color of improved varieties of Kentucky Bluegrass, Fine Fescue and Perennial Ryegrass. PLUSH will retain it's dark green color throughout the year. Unlike lesser quality blends, PLUSH performs even during extended periods of heat and drought. These benefits, plus improved disease resistance give PLUSH a lower general maintenance cost than older, less improved Fescue Blends.

## COMBINES ALL THESE FINE TURF ADVANTAGES:

- **Heat and Drought:** Highest Tolerance Available
- **Texture:** Medium Fine
- **Color:** Dark Green Year Round
- **Cold Tolerance:** Good
- Improved Disease Resistance
- Good Wear Ability

### **Seeding Rate:**

10 to 12 Lbs/M sq ft

### **Average Emergence:**

10 to 21 Days

### **Average Establishment:**

50 Days
